PERSONAL SKILLS

Technical Skills: Java, C/C++, Python, Go, C#, JavaScript | Spring Boot, Django, Flask, MySQL, Redis, Kafka/RocketMQ | AWS, Docker, CI/CD | OpenAI API, LLM pipeline, Pandas, NumPy | Git, Linux, Agile, Unit Testing
Languages: English (Fluent), Mandarin (Native)

Other: English (fluent), Mandarin (native)ACADEMIC EXPERIENCES

Software Engineer (Project) — NFT Digital Collectibles Platform (App/H5/Admin)
May- August 2025

- ✓ Developed admin backend for collections, inventory, users, and analytics; integrated blockchain ops via Wenchang Chain.
- ✓ Implemented Spring Cloud Gateway + Sa-Token for authentication; used Redis for distributed sessions and caching; introduced Redis + snowflake IDs for unique order generation.
- ✓ Designed pluggable multi-chain adapter using Factory/Strategy patterns, enabling rapid onboarding of new chains.
- ✓ Optimized MySQL queries with EXPLAIN and composite indexes; reduced query latency by ~40% under load.
- ✓ Ensured DB – cache consistency under high concurrency via delayed double-delete strategy.
- ✓ Integrated ElasticSearch for collectible search, resolving slow fuzzy query performance.
- ✓ Enhanced order module: prevented duplicate submissions and handled order expiration with XXL-JOB + thread pool, improving throughput from 10→50 orders/sec.
- ✓ Integrated Dubbo for RPC-based microservice communication, enabling efficient service-to-service calls and scalability.

Tech: Spring Boot, MyBatis-Plus, Redis, MySQL, JWT, Vue, RocketMQ, XXL-JOB, Wenchang Chain, ElasticSearch, Canal, Dubbo, Docker

Software Engineer (Research Project) — LLM Verification Pipeline
Jan - May 2025

- ✓ Built a reproducible pipeline to collect, consolidate, and analyze LLM outputs across topics and models.
- ✓ Implemented statistical checks: Benford's Law (leading-digit chi-square) and Zipf's Law (word-frequency slope/R^2).
- ✓ Automated data merging and topic labeling via consolidate.py; exported per-topic comparison CSV and plots.
- ✓ Produced canonical dataset (combined_outputs.jsonl) and reusable Python package (llm_verification/…) with analyzers and visualization utilities.
- ✓ Delivered results as outputs/topic_comparison.csv and summary plots, supporting reproducibility with archived scripts and data.

Tech: Python, NumPy, Pandas, Matplotlib, SciPy, NLTK, tqdm, OpenAI API

PROFESSIONAL EXPERIENCES

IT Operation & Maintenance Engineer — Anhui Jiexi Pharmaceutical Co., Ltd.
June - November 2023

- ✓ Maintained ERP/OA systems, servers, and network devices; resolved 50+ incidents/month.
- ✓ Managed provisioning, monitoring, and backup/recovery for enterprise servers.
- ✓ Supported deployments and security rollout; documented SOPs for smoother handover.

EDUCATION

University of California, Riverside, United States September 2024 - March 2026 (Expected)
Master of Science in Computer Science
Shanxi University, Taiyuan, China September 2020 - June 2024
Bachelor of Engineering in Software Engineering
